How can I know which is the maximum depth of a certain xml document? This is just one example, where such functionality could be useful. A: There is no absolute maximum on the depth of an XML document (the specification doesn't mention it). But many XML parsers implement some upper limit, and sometimes more than that. You might, for example, find it useful to test for the presence of a DTD in a document before performing further processing. The US ambassador to the United Nations Nikki Haley said on Tuesday that Washington would no longer recognize Jerusalem as Israel's capital, adding that it would be up to the "deciders" to resolve the issue, as it was not discussed at the council. "Jerusalem has been the capital of Israel since the creation of the state in 1948, and it was the capital of Israel before 1967," Haley said before the council. "Since that time, numerous presidents, prime ministers and foreign leaders have made this a major
